The First Coast leader for integrated environmental and industrial services

In May of 2011, Moran Environmental Recovery (MER) acquired Jacksonville Pollution Control, a long established Oil Spill Removal Organization (OSRO) in the Northeast Florida market. The affiliation between Jacksonville Pollution Control and Moran Environmental Recovery creates a formidable organization for servicing Florida's First Coast. JPC, an experienced and professional first response contractor, has been servicing the port of Jacksonville 24 hours/day since 1973.

History and Overview:

Jacksonville Pollution Control (JPC) was established in part to service the membership of Jacksonville Spillage Control, an oil spill cooperative, which was created in 1973 as the first of its kind in the United States. In addition to providing OSRO services to the cooperative, JPC provides routine industrial cleaning and response services to a number of clients throughout the Jacksonville area. With one of the region's largest inventory of specialized response equipment and specially trained personnel, JPC is recognized as one of the region's most reliable service providers.

- * 24 Hour Emergency Response
 - * Land Based
 - * Marine Based
- * Boom Deployment
- * AMPD Services
- * Vacuum Truck Services
- * Training
 - * First Responder
 - * HAZWOPER
- * Lab-Pack and Waste Disposal
- * Soil Remediation

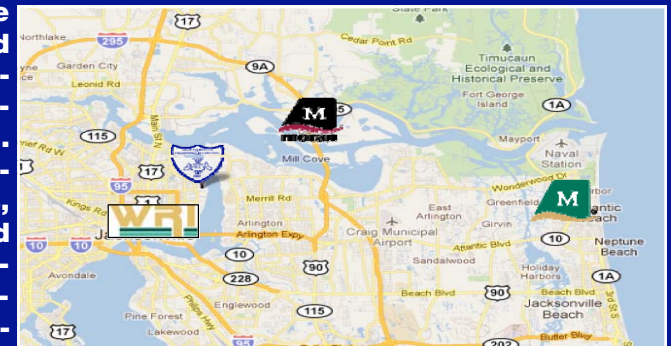

Combined with MER, a nationally recognized Oil Spill Removal Organization, JPC has greater access to state of the art equipment as well as expertise in Emergency Response, Industrial Cleaning, Facility Decontamination and Site Remediation. Moran Towing, a partial owner and valued partner to MER, is very active in the Port of Jacksonville and can support JPC clients through Line Handling, and Tug and Barge services.

The MER affiliation also provides JPC clients with access to Water Recovery (WRI), a regionally recognized and award-winning integrated waste water pre-treatment facility and permitted used oil recycler. WRI handles a variety of waste streams and is at the leading edge of the latest treatment technologies.

JPC, MER, Moran Towing, and WRI are proud members of the First Coast community. Their affiliation creates the stand-alone leader in providing integrated environmental services in this region. JPC clients gain seamless access to all of these resources through their existing service relationships with JPC's dedicated staff. JPC will operate as a subsidiary of MER, and will continue to service clients and contracts under its existing Jacksonville Pollution Control brand.

JPC clients will benefit from the existing expertise of JPC's employees, backed by the combined resources and experience of the MER family of companies, the First Coast's leader for integrated environmental and industrial services.

"Longevity, Reliability and Quality of Service"

"A small personable company that delivers big results."
